PROFILE SUMMARY

BCA graduate and frontend developer focused on building responsive web applications with React.js and JavaScript. Hands-on experience with REST APIs, state management, authentication, and full-stack development using Node.js, Express.js, and MongoDB. Seeking an entry-level Frontend Developer role to contribute to real-world products and grow through practical development.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+)
- **Frontend:** React.js, React Hooks, React Router, Redux Toolkit, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB
- **Tools:** Git, GitHub, Axios, Vite, Thunder Client, ESLint

KEY PROJECTS

1. DevBlog - Full-Stack Blog Application

Tech: React.js, Node.js, Express.js, MongoDB, JWT, React Router, Axios, CSS3

[🔗 Live Demo](#) | [📁 GitHub Repo](#)

Overview: Full-stack blogging platform with authentication, content management, profiles, comments, bookmarks, and protected functionality.

- Built REST APIs with Express.js and MongoDB for post, user, comment, category, and bookmark data.
- Implemented JWT authentication, protected routes, ownership checks, and login/logout flows.
- Developed CRUD workflows and responsive React UI with reusable components, theme support, and loading/error states.

2. YWatch - YouTube Clone

Tech: React.js, JavaScript, YouTube Data API, React Router, CSS3

[🔗 Live Demo](#) | [📁 GitHub Repo](#)

Overview: YouTube-style video browsing application using the YouTube Data API to search, browse, and watch videos.

- Integrated YouTube Data API for video feeds, search results, video details, and related content.
- Implemented debounced search, routing, loading/error handling, and responsive sidebar/navigation behaviour.
- Built reusable video-card and player-related UI components for desktop and mobile layouts.

3. MeghDarshan - Weather Dashboard

Tech: React.js, JavaScript, Open-Meteo API, Geocoding API, CSS3

[🔗 Live Demo](#) | [📁 GitHub Repo](#)

Overview: Responsive weather dashboard that retrieves location-based weather data and presents current, hourly, and multi-day forecasts.

- Integrated weather and geocoding APIs for city search, current conditions, and forecast data.
- Built 24-hour and 5-day forecast views with temperature, humidity, wind direction, and condition displays.
- Added API error handling and responsive layouts for desktop and mobile screens.

4. Mini Mart - E-Commerce Web Application

Tech: React.js, JavaScript, REST API, CSS3, Local Storage

[🔗 Live Demo](#) | [📁 GitHub Repo](#)

Overview: Frontend e-commerce application for browsing products, viewing details, managing a cart, and preserving cart data.

- Integrated DummyJSON API to fetch and display product data dynamically.
- Implemented product browsing, product details, cart management, and local-storage persistence.
- Designed responsive shopping UI with reusable React components and client-side state handling.

EDUCATION

Bachelor of Computer Application (B.C.A.)

H. L. Patel College, Bhayavadar | 2022-2025 | CGPA: 7.86/10

LANGUAGES

English | Hindi | Gujarati
